## The Reading Tree

Our groups are small. As a result, we are able to constantly assess students' progress so that we can provide supplemental help in areas where a particular student may experience difficulty. This is particularly true in math, where some students have not learned how to reason their way through multiple process questions.

Our course may be rigorous, but it pays off. After taking the test one student reported to an instructor, "The test was easy compared to the work you gave us."

We are offering seven classes in the fall of 2009 that prepare 8<sup>th</sup> gr. students for the HSPT.

Each class consists of 8, 1.5 hour sessions

Course Fee: \$360
